

Enter text here

Enter more text here

...and more text here

...and even more text here

...and if you really wanted to, even more text here

Ideally, you'd be able to push this button as many times as you wanted to keep adding boxes underneath

The same would be true for this button, and so on

These boxes with the dotted lines would also be free text, so that any variable could be entered (e.g. "yes", "no", or "maybe")
